

USE

For use in a wide range of environments, from hospitals, to schools, this Steroguard biohazard kit meets all health and safety guidelines without the need for first aid training.

DESCRIPTION

This product is ideal for safe and effective handling, containment, disinfection, and disposal of infectious micro-organisms in bodily fluids, including blood, vomit and urine.

FEATURES & BENEFITS

- 50ml disinfectant spray
- Biohazard bag
- Disinfectant wipe
- Pair of disposable gloves
- Polythene apron
- Scoop and scraper
- Super absorbent powder

HOW TO USE

Recommended for professional use only. The super absorbent powder will immediately begin to turn the liquid into a solid when poured onto the spillage area, making it easy to clean small and large spillages and allowing the safe disposal of infectious bodily fluids. Everything supplied is of high quality, tried and tested, and designed to meet the strictest global standards.

PACKAGING

EA128 1 x 1

BIODEGRADABILITY

All surfactants used in this product comply with the current European Regulations concerning biodegradability and protection of the environment.
